

LAW

Provides That All Persons Shall Be Enumerated

At Their "Usual Place Of Abode"

Some Information About The Law

Washington, D. C., Feb. 22.—The explicit and lengthy printed instructions to the census enumerators, which have been prepared by the United States census bureau, give a clear idea of the character of the answers expected from the people of the United States with regard to the questions in the population schedule to be carried in the Decennial census April 15 next.

All answers are to have reference solely to the "Census Day," which is April 15. Persons living on that day, but who died after it and before the enumerators call, are to be counted, but persons born after April 15 are not to be included in the count. Persons who were single on April 15 are to be reported as single, even though they have married subsequently and before the canvasser has called. This is true, similarly, of persons who became widowed or divorced after April 15.

The census law provides that all persons shall be enumerated at their "usual place of abode" on April 15. This means the place where they may be said to live or belong or the place which is their home. As a rule, the usual place of abode is not the place where a person works or where he eats, but where he regularly sleeps. The enumerators are cautioned, however, that where a man happens to sleep at the time of the enumeration may not be the place where he regularly sleeps.

There will be a number of persons having their usual places of abode in enumeration districts who will be absent April 15. These are to be included and enumerated after the facts regarding them have been obtained from their families, relatives, acquaintances, or other persons able to give the information. For instance, if a member of any family in an enumeration district is temporarily away from home on a visit, or on business, or traveling for pleasure, or attending school or college, or sick in a hospital, such absent person is to be enumerated and included with other members of the family. But a son or daughter regularly living in another locality should not be counted with the family at home.

Servants, laborers, or other employees, who live with the family, and sleep in the same house or on the premises, should be enumerated with the family. The census bureau states that there will be, on the other hand, a certain number of persons present and perhaps lodging and sleeping in districts at the time of the enumeration who do not have their usual places of abode there. These are not to be enumerated. It must be assumed that they will be enumerated elsewhere. The canvassers should not, therefore, unless it is practically certain that they will not be enumerated anywhere else, enumerate or include with the members of a family they are enumerating any of the following classes:

Persons visiting a family; Transient boarders or lodgers who have some other usual or permanent place of abode; Students or children living or boarding with a family in order to attend some school, college, or other educational institution in the locality but not regarding the place as their home; Persons who take their meals with a family but lodge or sleep elsewhere; Servants, apprentices, or other persons employed by a family and working in the house or on the premises, but not sleeping there; or Any person who was formerly in a family, but who has since become a permanent inmate of an asylum, almshouse, home for the aged, reformatory, prison, or any other institution in which the inmates may remain for long periods of time.

VITAL CENSUS QUESTIONS
Washington, D. C., Feb. 22.—The character of the questions concerning color or race, aged at last birthday, conjugal condition, number of years of present marriage, the number of children born, and the number of children now living, to be asked by the enumerators in the Thirtieth United States census, beginning April 15, next, is clearly explained in the printed instructions to the census

takers, which have been prepared by the United States census bureau. All the questions relate solely to conditions existing on the "Census day," which is April 15.

Answers relative to color or race are to be entered on the schedule as "W" for white; "B" for black; "Mu" for mulatto; "Ch" for Chinese; "Jp" for Japanese; and "In" for Indian. For census purposes, the term "black" (B) includes all negroes of full blood, while "mulatto" (Mu) includes all negroes not of full blood, but having any perceptible trace of negro blood.

As to age at last birthday of the person enumerated, the enumerators are cautioned that this question calls only for the age in completed years at the last birthday. Therefore, a person whose exact age on April 15 is 17 years, 11 months, and 5 days should be returned simply as 17, because that is his age at his last birthday. In the case of children not two years old, the age should be given in completed months, expressed as twelfths of a year. Thus, the age of a child 3 months old should be entered as 3-12, a child 7 months old as 7-12, a child 15 months old as 15-12, etc. If a child is not yet a month old the enumerators are to enter the age as 0-12. A child who is just a year old on the 17th of April, 1910, should nevertheless be returned as 11-12, because that is its age in completed months on April 15. The enumerators are told to take particular pains to get the exact age of children.

If the person was born outside the United States, the enumerator is to enter the country (not city or district) in which he was born. Instead of Great Britain, he is told to write Ireland, England, Scotland, or Wales.

In the case of persons born in the double kingdom of Austria-Hungary the enumerator is cautioned to be sure to distinguish Austria from Hungary. In the case of those born in Austria proper, they are to distinguish also those born in Bohemia and those born in Austrian Poland.

They should write Finland and not Russia for a person born in Finland. The inquiry as to the number of children born applies to women who are now married, or who are widowed, or divorced. The answer should give the total number of children that each woman has had during her lifetime. It should include, therefore, the children by any former marriage as well as by her present marriage. It should not include the children which her present husband may have had by a former wife, even though they are members of her family. Still-born children are not to be included.

The question concerning the number of children now living refers only to the children which the woman herself has had. The enumerator is required to include all of these children that are living, no matter whether they are living in his district or somewhere else.

THRIFTY

Was Rollin C. Curtis In Renting A Sleigh

And Made Big Profit Out Of His Investment

Mr. Rollin C. Curtis drifted into a reminiscent mood in discussing the unusually severe winter weather with a Banner man.

"The most snow I ever saw," remarked Mr. Curtis, "was in the winter of 1851, when there was good sleighing for thirteen weeks. I think of three months of 'the beautiful' on the ground! That's going some! But it was an 'ill wind that blows nobody good,' and I was the one to profit by it."

"Shoveling snow?" ventured the Banner man.

"I? Not much! I was only a lad, but by perseverance and industry had accumulated five dollars—all good gold dollars which my mother carefully kept for me tucked away in the back part of a bureau drawer. About the time of the first fall of snow I read in the Banner an advertisement of a sleigh for sale, and at once I thought I saw an opportunity to make some money. I hunted up the man who owned it and learned he would sell it for \$5. It was a rather dilapidated vehicle, but I concluded to buy it, which I did, and hauled it down in front of my father's hardware store in the room now occupied by the Guaranty bank. Along came a young man who wanted to hire the sleigh for a ride to Fredericktown and offered me fifty cents for its use. I pointed out to him its weak condition, but he was willing to chance his life in it, and agreed if it broke down to have it repaired for me. He got back all right and with the fifty cents he gave me I had some braces put on the sleigh, which made it perfectly sound, and then I proceeded to hire it out for the balance of the winter. Well, to make a long story short, I took in \$78 that winter renting the sleigh, and just as the snow was about leaving the ground I sold it for \$13. How is that for making money on an investment of \$5?"

"Does an affidavit accompany your statement?"

The comrade crossed his heart.
